RE: U.S. FLAG & CERTIFICATE

My brother served as a critical care trauma nurse in Afghanistan, keeping alive exploded victims of IEDs (roadside bombs) missing arms and legs. He brought back a U.S. flag for me from one of the critical care flight missions. I display the flag in my home. This is the certificate that went with it. Captain Jason Lee Straw, USAF (ret.), thought this flag would be meaningful to me because I was directly impacted and injured by the toxic dust in October 2001. It is very meaningful to me.

My brother and myself on or about July 4, 2012:

I, Andrew U. D. Straw, verify that the above statements are true and correct on penalty of perjury.

Dated this 15th day of October, 2023.

Respectfully,

Andrew U. D. Straw
